

Configure Single Sign-On

Step 3: Set Identity Provider Metadata

⚠ Your organization must have a verified domain in order to activate Single Sign-On. Please reach out to Cursor if you need assistance.

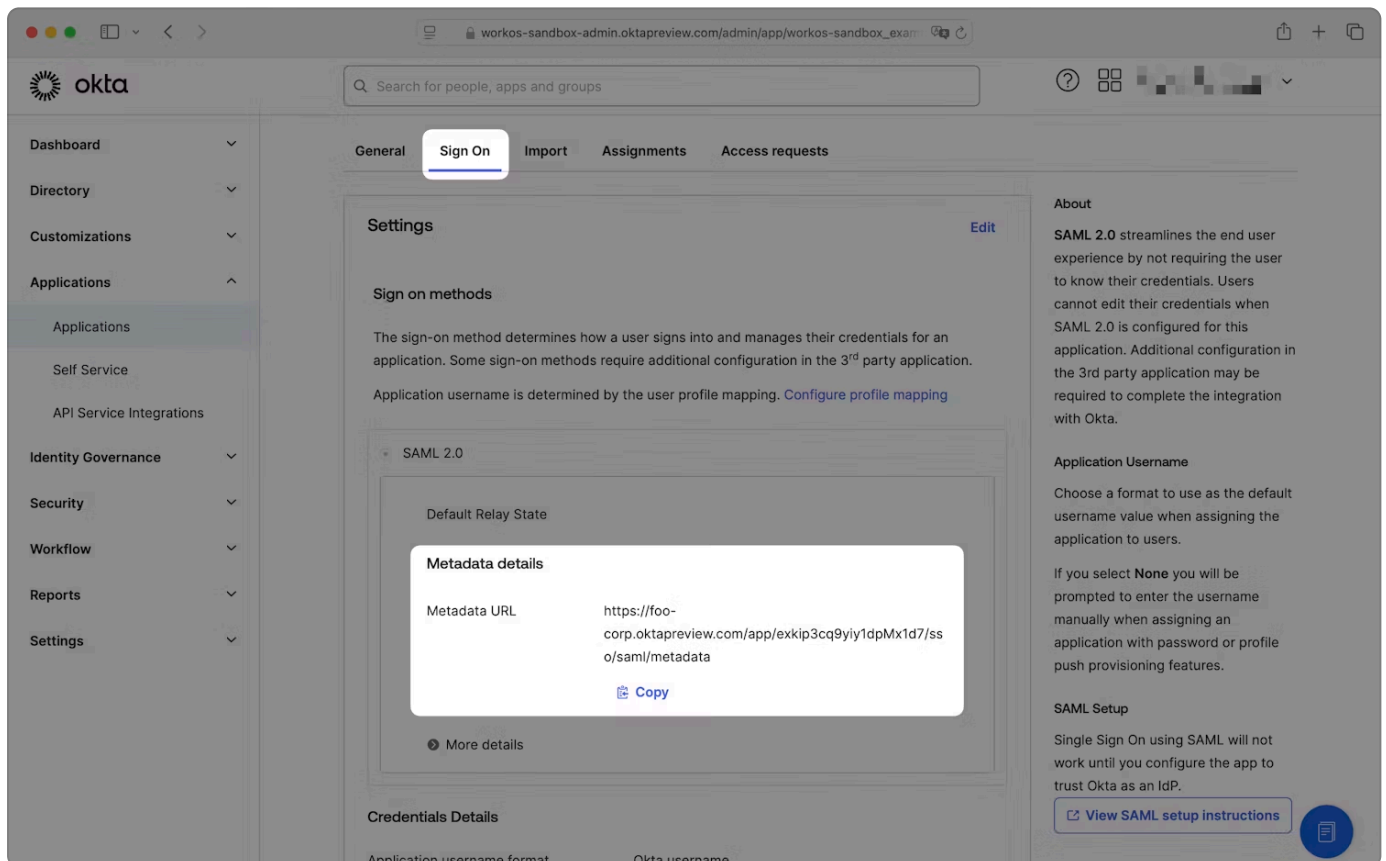

Dynamic configuration

Recommended

Manual configuration

Enter identity provider details

On the **Sign On** tab, in the **Metadata details** section, locate the **Metadata URL**. Click on the **Copy** button.

Paste the value into the **Identity provider metadata URL** field below to continue to the next step.

Identity provider metadata URL

https://
