

Configure Single Sign-On

Step 1: Create a SAML Integration

⚠ Your organization must have a verified domain in order to activate Single Sign-On. Please reach out to Cursor if you need assistance.

Sign in to the Okta admin console.

In the left navigation menu, expand the **Applications and Resources** section and select the **Applications** tab.

Click **Create App Integration**.

In the **Create a new app integration** dialog, select the **Classic experience** tab, then select **SAML 2.0**. Click **Next**.

The **Create SAML Integration** wizard will open. On the **General Settings** step, enter an appropriate app name, such as "Cursor". Optionally, you can upload an app logo. Click **Next**.

App logo

Optionally, you can add an App logo to serve as the app's entry point on the Okta End-User Dashboard. Including a logo helps users easily identify and access Cursor.

The following logo is available for you to use. Download the image and then upload it to Okta.

Download logo

On the **Configure SAML** step, locate the **Single Sign-On URL** and **Audience URI (SP Entity ID)** fields. Copy the values below and paste them into their respective fields in the Okta admin console.

Single sign-on URL

<https://authenticate.cursor.sh/sso/saml/acs/fqGJKVn0U1LbhZkyEtwCr4kUS> 

Audience URI (SP Entity ID)

fqGJKVn0U1LbhZkyEtwCr4kUS

Audience URI (SP Entity ID)

Default RelayState

If no value is set, a blank RelayState is sent

Name ID format

Application username

Update application username on

Show Advanced Settings

What does this form do?
This form generates the XML needed for the app's SAML request.

Where do I find the info this form needs?
The app you're trying to integrate with should have its own documentation on using SAML. You'll need to find that doc, and it should outline what information you need to specify in this form.

Scroll down to the bottom of the page, then click **Next**.

Okta Admin Console
